

SWEAGLE[®]

THE NEW STANDARD

FOR SEWER AND STORM WATER JETTING NOZZLES

We at NozzTeq[®] have always strive to improve performance and efficiency of our products, by improving existing products or developing new products. This was done with the help of from our customers, their knowledge, their input and needs.

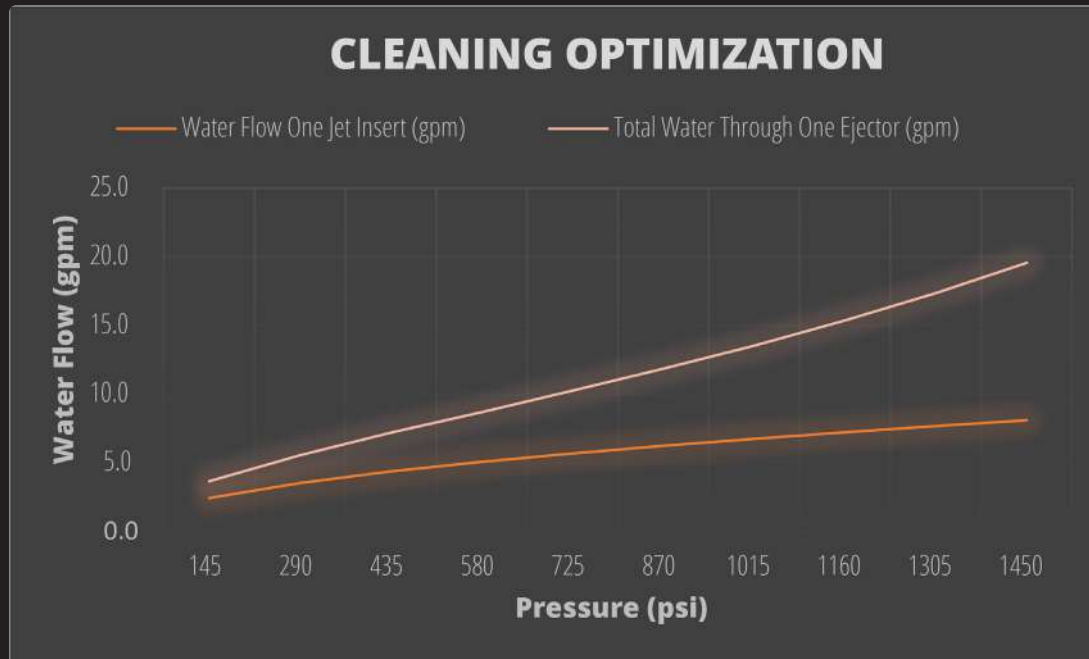

The market has long been missing an effective ejector nozzle, utilizing the existing water in the pipe to move and transport debris in the pipe, such as sand, sludge, and stones. The main operating problem has been the jets did not reach out to the sides of the pipe, which resulted in material being left on the sides of the pipes.

NozzTeq[®]

With our experience in the industry, working not only with jetting nozzles and cutters, but we have also utilized our know how from other sectors of business to develop the SWEAGLE®, After conducting extensive field test with our customers, we can now present the SWEAGLE®.

The SWEAGLE® will perform excellent not only in water filled pipes, but also in dry pipes as well. The key is the buildup of the water directing system together with the exact design of the ejector system inside the jetting nozzle. The SWEAGLE® can be used with fresh water or recycled water.

Technical Data

Article Number: 2-11670-C07-JC
Connection: 1 & 1 1/4"
Diameter Water Filled Pipe: 10" - 60"
Diameter Regular Pipe Cleaning: 10" - 32"
Dimensions: Ø 6,7" x 11"
Wheight: 19 lbs
Max Pressure: 3625 psi
